PROFESSIONAL SUMMARY

Business Analyst with 3+ years of experience across Healthcare, Retail, and Supply Chain, delivering 12+ BRD/PDDs, 9 production automation workflows, and a 60-70% reduction in reconciliation runtime through SQL optimization. Skilled in requirements elicitation, BRD/PDD authoring, stakeholder workshops, gap analysis, UAT coordination, wireframing (Balsamiq), and SQL-based data analysis - partnering with business and technical teams to deliver production-ready solutions in Agile/Scrum environments.

SKILLS

- **Business Analysis:** Requirements Gathering, Requirements Elicitation, BRD Authoring, PDD Authoring, Gap Analysis, As-Is/To-Be Process Mapping, Stakeholder Management, Stakeholder Workshops, UAT Coordination, Root Cause Analysis (RCA), Wireframing, Data Mapping
- **Technical:** SQL, PostgreSQL, REST APIs, API Integration, OAuth, RBAC, Data Analysis, Angular, C#, .NET
- **Automation:** RPA, BPA, Process Automation, Workflow Automation, IntelliBuddies (Orchestration Platform)
- **Methodology:** Agile, Scrum, SDLC, Business Process Improvement, Production Support
- **Tools:** Jira, Draw.io, Balsamiq, GitLab, Postman
- **Domain:** Healthcare (HIPAA-governed data), Retail, Supply Chain

PROFESSIONAL EXPERIENCE

Vyshanavi Information Technology (VIT)

Feb 2023 - Present

Software Engineer / Automation Consultant (Business Analysis & Process Automation)

Client: SolutionReach (Healthcare, HIPAA-governed)

- Authored 12 BRD/PDDs across 10+ healthcare Practice Management platforms (Dentrix, Eyefinity Encompass, Denticon, Eaglesoft, RevolutionEHR, and 5 others), covering Ledger Writeback, Appointment Creation, and Patient Intake workflows; personally delivered 9 of 9 assigned automation workflows while directing a junior analyst.
- Owned end-to-end production support for 12 live automation workflows - daily log monitoring, root-cause analysis on failures, UAT coordination with stakeholders, and fix deployment through staging to production.

Client: Third Wave Coffee (Retail) - Revenue Reconciliation System

- Cut PostgreSQL reconciliation runtime 60-70% (15-30 min to 5-10 min) through query optimization; contributed to database design - indexing, partitioning, materialized views - across 8 data sources.
- Built cross-source reconciliation logic and data mapping, enhanced dashboards with line-item and commission breakdowns, and reviewed query work for junior team members.

Client: TVS Motor Company (Supply Chain)

- Led stakeholder workshops with 9+ participants across Dispatch and Procurement, mapping As-Is process gaps and defining a To-Be digital workflow; evaluated API integration and RBAC requirements for secure system access.
- Authored the BRD/PDD for the Inter-Plant Purchase Order lifecycle, defining scope, objectives, and end-to-end process flows; led technical clarification sessions with development teams ahead of build.

Internal & Cross-Team Automation Projects

- Led process review and root-cause analysis for the Expense Reimbursement workflow (~250 employees), supporting testing through staging and production deployment.
- Engineered a 4-stage attendance automation pipeline for ~250 employees across 2 branches, including API sync to the HRMS system and automated absence/missed-punch reporting.
- Designed IntelliInvoice, a rule-based invoice data-extraction tool built in Angular with dynamic field highlighting; demoed to company leadership.

CERTIFICATIONS

- Agile Explorer - IBM
- Google Analytics - Google
- Enterprise Design Thinking Practitioner - IBM
- Project Management Fundamentals - IBM
- SQL and Relational Databases 101 - Cognitive Class

EDUCATION

M.Tech, Software Engineering - BITS Pilani (WILP)

2024 - Present (Expected 2027)

B.E., Computer Science Engineering - Mepco Schlenk Engineering College

2019 - 2023
